

TERRAFLOOR®

NEW

The revolutionary decorative system of polished cement screeds imitating granite or marble but surpassing them in terms of the design and color capabilities. The use of nanotechnology provides a mirror finish surface and high resistance to abrasion, chemical attack, UV radiation, stains and makes it easy to clean. The very rich colors allows to tailor to both individual client needs and the specific nature of the object. To be used on old and newly made concrete floors.

STYLE

AESTHETICS

PURPOSES

- apartments
- shopping centers
- shops
- manufacturing facilities
- schools, airports, railway stations
- auto showrooms
- sacred objects

DURABILITY

BENEFITS

- look similar to granite, marble, etc
- mirrorlike smoothness and gloss
- easy to clean
- long life
- easy implementation
- high chemical and mechanical resistance
- wide range of colours

STAGES OF IMPLEMENTATION

1
Preparation of concrete base

2
Priming with BAUBOND and BAUGRUNT

3
Spreading 15-30 mm thick layer of TERRATOP

4
Trowelling with a power trowel for complete closure of porosity

5
Polishing the floor in several cycles using planet grinders with TERRASEAL

6
Application of the TERRACOAT and polishing for extra shine and sealing of the floor
